

2nd Onchan Scout Group

COVID-19 RISK ASSESSMENT

This Risk Assessment only covers the risk to individuals being exposed to Covid-19 whilst taking part in Scouting Activities during the Covid-19 pandemic. It does not cover other risks associated with the running of those activities and Leaders should separately refer to the 2nd Onchan Risk Assessments for use of the Scout Hall and Outdoor Activities. A dynamic risk assessment should be continually carried out by Leaders in line with Isle of Man Government Guidelines.

The Isle of Man currently has no active Covid-19 cases in the community. The risk of catching Covid-19 is therefore exceptionally remote at present given that there are no Covid-19 community cases. This risk level remains whilst the Island's borders are closed and so few control measures are necessary and proportionate. Social distancing regulations have been removed by the Isle of Man Government.

	Who?	Likelihood				Seriousness				Total	Control Measures
		imp	rem	pos	pro	nin	min	maj	f		
Higher risk of virus spreading if social distancing not maintained	Everyone		✓					✓		6	Social distancing not required at this time, but sections will be encouraged to hold meetings outdoors where possible to allow for greater distancing between members. Leaders should monitor Government Guidelines and if social distancing becomes required then this must be enforced, and further control measures can be put in place.

2nd Onchan Scout Group

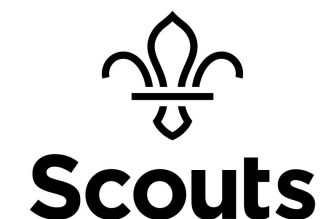

Hygiene of people: higher risk of virus spread if proper hand washing not carried out	Everyone		✓					✓		6	Alcohol Hand Sanitizer will be installed at entrance points to the Scout Hall together with appropriate signage. All visitors will be required to sanitize hands on entry. Signage will be installed in bathrooms to encourage hand washing and Leaders will ensure sufficient supplies of soap. This will limit the risk of the virus being on a door handle. Where Scout Activities are not taking place in the Scout Hall, Leaders will ensure that they have Hand Sanitizer for members' use before the meeting begins.
Hygiene of toilets: higher risk of virus spread if hygiene not carried out.	Everyone		✓					✓		6	Toilets will continue to be routinely cleaned approximately 3 times per week with anti-bacterial products. If the Island develops active cases then this will be increased.
Hygiene of activity equipment: Higher risk of virus spread if hygiene not carried out.	Everyone		✓					✓		6	Leaders will ensure as little equipment is used as possible. Users will have sanitized their hands in advance of using such.
Hygiene of non-Scout users of the Hall: higher risk of virus spread if hygiene not carried out	Everyone		✓					✓		6	All users of the Scout Hall will be sent this Risk Assessment and any update thereof and will be required to follow control measures put in place in order to continue to use the Hall. We shall

											continue to ensure the Hall is routinely cleaned.
Hygiene of Scout Hall generally: higher risk of virus spread if hygiene not carried out	Everyone		✓					✓		6	Our Hall is cleaned up to three times per week during which all surfaces are wiped, floors brushed and mopped, door handles cleaned all with anti-bacterial products. We shall continue to ensure the Hall is routinely cleaned and, should an active case be reported on the Island, then this will likely be increased.
Individuals attending the Scout Hall with Covid-19 symptoms	Everyone		✓					✓		6	All users of the Hall will be informed that they should not attend at the Scout Hall if they have any signs or symptoms of having Covid-19. If an individual presents with symptoms they will be asked to leave and the session ended. The Hall will then be deep cleaned and no persons permitted to use the same until this has been completed.
An individual with Covid-19 attends the Hall.	Everyone		✓					✓		6	If it is discovered that an individual has attended the Hall with Covid-19 then the Hall will be closed immediately and deep cleaned. A register of individuals who have been in the Hall will be kept and we will co-operate with Public Health Track and Trace staff.

2nd Onchan Scout Group

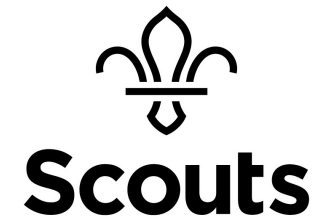

Higher risk to those with pre-existing medical conditions catching virus	Those with pre-existing medical conditions		✓					✓	6	All members and Leaders will be written to before Scout meetings resume. Attendance will be entirely voluntary, and all will be made aware of this risk assessment and the control measure put in place. If those with pre-existing medical conditions do not feel comfortable there is no requirement for them to attend the Hall. Alternatively if they would wish for some additional help and support then the same will be considered.
Risk associated with handling food and contact with the mouth	Everyone		✓					✓	6	Leaders will be encouraged to not run programme ideas that involve the preparation and consumption of food as items which touch surfaces and then an individual's mouth provide some risk. No sectional tuck shop shall operate.
Individuals returning to the Isle of Man from countries which have Covid in the community (such as UK) having contracted Covid	Everyone			✓				✓	9	Individuals who have returned to the Island from a country with Covid in the community (such as the UK) are not to attend at the Hall or any Scouting event until they have been on the Island for 14 days and not developed any Covid symptoms. This position similarly applies for individuals who are in the same household as someone isolating as a

											result of a return to the Island, or where a member of the household has Covid like symptoms. Members of that household must not attend at the Hall or any Scouting event.
--	--	--	--	--	--	--	--	--	--	--	--

KEY:

Likelihood: **imp** = impossible(1), **rem** = remote(2), **pos** = possible(3), **pro** = probable(4)

Severity: **nin** = non-injurious(1), **min** = minor injury(2), **maj** = major injury(3), **f** = fatal (4)

Total: = likelihood value x severity value

1-4 = **low risk**

5-9 = **medium risk**

10-16 = **high risk**
